PESTICIDE | SAFE APPLICATION OF PESTICIDES IN TREE STUMPS – PA6PP

Half Day PA6 Pesticide Plugs in Tree Stumps training to prepare candidate for the City & Guilds NPTC practical assessment. PA6PP has been developed for the use in stumps to prevent regrowth. It can be used on stumps such as buddleia, rhododendrons etc. It is particularly useful to treat stumps in difficult to access areas where returning to deal with regrowth is an issue. This method can be used when it is raining, snowing and even frost without run off as the application method ensures that the product is retained within the stump.

COURSE CONTENT

- Legal Requirements
- Basics of Pesticide Plug Use
- Hygiene and Personal Protective Equipment
- How Pesticide Plugs Work
- Preparation of the Equipment needed for working with Pesticide Plugs
- Pesticide Plugs
- Calibrating the number of Pesticide Plugs to be used
- Application in or near water
- Preparation, Insertion and Site Work
