

Responsible and Effective Control of Commensal Rodents (E-Learning)

At a glance...

E-Learning

Duration Notes:	2.5 - 3 Hours
Recertification Period:	5 year recommendation
Prerequisites:	Internet access through PC, laptop or tablet.

Introduction

Gain an industry-recognised certificate from the comfort of your own home with our one-day course in rodent control.

Overview in brief

This course focuses on both preventive and curative methods of rodent control.

It will teach learners how to use the most efficient and safe method of control whilst minimising damage to the environment.

Whilst the course covers key rodent control legislation, it's essential that anyone working in pest control keeps up-to-date with changes in legislation and best practice.

The finer details

There are five modules in this course. A minimum score of 80% is required to pass it.

Upon successful completion, a Lantra certificate of training will be available to download and print.
